DRAMA UNFOLDS — The University Dance Company and the National Shakespeare Company exhibit their talents in this special effect picture.

The Unicorn (Larry Fields) tempts the maiden (Janet Mitchell) in this scene (upper left) from "The Unicorn, the Gorgon and the Manticore" presented by the dance company Sunday night in the Music Recital Hall.

Ariel (Carol Flemming) listens attentively to Prospero (Philip Hanson), while Miranda (Jeanne Rostaing) weeps in this presentation (lower right) from "The Tempest" staged last night in the UC. (Staff Photos by Gordon Lemon)

Athletic fund transfer urged

The Faculty Athletic Committee passed a measure last night recommending that the \$8 student fee now earmarked for intercollegiate

athletics be reallocated to the ASUM Budget and Finance Commission.

The measure has to be approved

by President Robert Pantzer and the State Board of Regents before it becomes effective.

The committee recommends that the ASUM Athletic Commission determine distribution of money allocated to intercollegiate athletics by the Budget and Finance Commission. Athletic Commission recommendations must be approved by Central Board.

The measure stipulates that Central Board cannot increase the total amount intercollegiate athletics receives by more than 20 per cent or decrease it by more than 12 per cent from the previous year's appropriation. However, a two-thirds majority of 50 per cent of the student body may overrule the stipulation in any given year.

Joe Mazurek, ASUM president, said the measure will probably go before the Board of Regents in April. If approved by the Regents and President Pantzer, Mazurek said the measure would first go into effect during the 1971-72 school year.

trying to provide in-depth campus news would create problems with the Establishment's rigid deadline.

He said Information Services had not been approached or consulted about the possibility of receiving ASUM funds to expand news coverage.

Jim Waltermire, chairman of the subcommittee, said more coverage of student government and organization meetings is needed. He said if the Kaimin is to continue to be the primary source of this news, coverage would have to be more complete.

News sheet would have difficulty expanding duties, director says

It would be difficult for the Establishment, a daily news sheet of Information Services, to provide in-depth campus coverage, Larry Stuart, Information Services director, said yesterday.

A subcommittee was appointed at last week's Budget and Finance Committee meeting to investigate the possibility of giving ASUM funds to Information Services for expansion of the Establishment or to the Montana Kaimin for expansion of its news coverage.

Mr. Stuart said the function of the Establishment is to provide "news in capsule form" and that

would," Mr. Watkins said, "because they were afraid of a commitment by the United States to defend small countries."

Suggestions made to policy-making groups in 1948 committed the United States to long-range policies without long-range planning, Mr. Watkins said, including the permanent stationing of the Seventh Fleet near Taiwan.

In order to gain long-range planning, Mr. Watkins said, foreign embassies should try to collect feedback on messages sent by the United States, and foreign officials should select information on a more objective basis, not in order to please higher officials.

"The utilization of an advocacy system as in law, with a defense and prosecution for each policy, would also increase objectivity," he said.

"Nations identify with other nations that they respect," he said. "The United States formulated a policy after World War II to gain that respect. But all we have to do is look at other nations to see that we didn't implement that policy. We only thought we did."

Foreign policy needs plan, professors says

By CAROLEE HAAS
Montana Kaimin Staff Writer

U. S. foreign policy needs long-range planning and planners, John Watkins, professor of psychology, said last night in an Interdisciplinary Lecture concerned with the psychology of foreign policy.

"Most policy is made reactively — we're forced to make a decision, and most of the time we abide by it for 20 years," he said.

The groups that make policy decisions tend to take higher risks than an individual acting alone, Mr. Watkins said. "This resulted in our involvement in Korea, and once we made the decision to become involved, our inability to look at the other side of the issue got us more and more involved," he said.

An examination of former President Harry Truman's personality, including his decision to use atomic weapons against the advice of his advisers and his unexpected presidential victory, should have provided a strong clue to the American public that he would give military support to Korea, Mr. Watkins said.

"But the public didn't think he

Petition opposes Anaconda easement

By SHARON SPECK
Special to the Montana Kaimin

A petition asking the State Land Board to postpone granting an easement of school trust land to Anaconda Co. appeared on campus yesterday.

The petition, circulated by the Environmentalists, a campus ecology group, requests that the Board postpone granting of the easement for at least three months. The Board is scheduled to grant or deny the easement at its March 2 meeting.

In issuing an easement, the Board would give Anaconda the use of school trust land in the Lincoln area.

Anaconda's recent application for an easement is to build a dam on Alice Creek, near Lincoln. The damming of Alice Creek, a tributary of the Blackfoot River, is part of Anaconda's plans for open-pit mining in the Lincoln area.

Jim Moore, graduate law student and author of the petition, said signatures were "moving along." He said the main purpose of the petition was to postpone the easement until Anaconda's activities in the Lincoln area could be "ecologically justified one way or another."

Moore said during the three months all pertinent facts should be made public, as public trust land is "held in common" with the people.

Anaconda owns all the land around Alice Creek, and its property completely surrounds the school trust land.

Moore said he has collaborated with

ASUM President Joe Mazurek, who has been contacting other Montana colleges in an effort to extend the easement issue statewide. Similar petitions will be circulated on other Montana campuses, Moore said.

Moore said letters to the Board from parents will be helpful because many people tend to discount student opinion.

P. L. MacDonald, Anaconda business manager, told the Montana Kaimin that Alice Creek contains only a small volume of water.

Mr. MacDonald said that damming of Alice Creek will create a lake which will "enhance the recreational value 100 times that of Alice Creek."

He said Anaconda doesn't plan to start mining operations in Lincoln until it is assured that mining of low-grade copper ore would be "economically feasible."

He denied that Anaconda would be a polluter.

"If we start an operation at all, we will then apply to the State Board of Health for a permit to operate and, of course, will comply with the legal standards set (for air and water quality)," he said.

"If we do find the grade of ore sufficient, and if we do decide to invest the capital in a mining operation, it will take maybe two and a half years before the operation is producing anything," he added.

Asked if any investigative studies of

the area ecosystem have been made, Mr. MacDonald said that samples of water have been taken in the Lincoln area, and that Anaconda has been working with the Fish and Game Department and other state agencies.

Mr. MacDonald said there would be no air pollution because the ore would be smelted at Anaconda. This means a transport system would have to be developed to move the ore from Lincoln to Anaconda, either in the form of railroads or a network of trucking roads.

Mr. MacDonald said mining operations would not upset the ecology of the Blackfoot River, because it is against the law to do so.

About 70 persons from western Montana conservation and environmental groups met Feb. 14 in Lincoln to discuss the possible effects of mining operations in the Lincoln area and on the Blackfoot River drainage system.

Bill Tomlinson, senior in wildlife biology who attended the meeting, said, the group was alarmed by the fact little information had been made public about Anaconda's plans for open-pit mining.

Cecil Garland, a Lincoln resident who called the meeting, told the Kaimin he would prefer that no large industrial company come into the valley.

"It isn't necessarily Anaconda I'm against, as I don't think they are the worst polluters, although not the least offensive, but we have a fragile ecological system here," he said.

"I know it's inevitable that Anaconda will come, but what we're really after is to have them come clean and stay clean. I'm talking about pollution of water, air and in general the aesthetics involved — for instance, noise," he said.

Mr. Garland said he was concerned about the lack of communication between Anaconda and the public.

"One of the major problems has been that Anaconda seems to have committed a lot of money to mineral mining exploration up there (in the high country surrounding Lincoln), but have not told us what they are planning," he said.

In reply to Mr. MacDonald's statement that damming Alice Creek will enhance recreational values, Mr. Garland said, "The value of lakes is frequently over-played. A man-made lake often times disrupts or even destroys an ecosystem," he said.

Mr. Garland said these kind of lakes sometimes turn into mudflats during July to October. If the planned Alice Creek reservoir becomes a mudflat during this season, then Mr. MacDonald's statement that recreational values will be enhanced is a "perversion of the truth," as a mudflat has little recreational potential, he said.

Moore said that State Land Board representatives have polled Lincoln residents and found that they endorse surveying of the easement.

Moore said he thought the survey displayed a "total absence of fact."

Editorial on pollution 'slanted and unfair,' faculty member says

To the Kaimin:

In your recent editorial headed "The President Scores Again" you have given an extremely slanted and unfair version of Mr. Nixon's recent moves to aid the fight against air and water pollution. You accuse him of giving only lip service to efforts to curb air pollution. I ask you to publish in the Kaimin the following paragraphs from a recent article in Chemical and Engineering News as part of this communication:

"Federal spending on air pollu-

tion control will jump from \$80 million last year to \$104 million this year. The increase in funds for the National Air Pollution Control Administration reflects additional assistance to state and local pollution control agencies, stepped up research and development on controlling air pollution from stationary sources, demonstration and testing of fuel desulfurization and large-scale testing of means of removing sulfur

compounds from combustion exhaust—especially limestone-based processes.

"The 31 per cent boost in federal air pollution spending matches the annual growth rate for federal, state, and local government expenditures projected in HEW's first report under the Air Quality Act of 1967. Out last week the Secretary's report, 'The Cost of Clean Air,' estimates that spending by industry to meet air quality standards under the act will rise sharply."

Environmentalists says Kaimin report on ecology meeting erred

To the Kaimin:

I wish to clarify several errors in your report on the last Ecology Action Committee meeting entitled "Environmentalists Claim Victory," on Feb. 19.

• The Environmentalists did obtain 800 signatures on a petition requesting that the Evans Co. install bag houses on their new plant to collect sander dust and other particulate emissions; however the "victory" was the result of a combined effort by several local environmental groups and concerned citizens of the Missoula valley.

• There is no "mill" operating at Rock Creek; however there is considerable logging. The Environmentalists do urge the public to call Jack Large at the USFS Regional Office in Missoula and demand a public hearing before the Forest Service continues its Rock Creek timber sales in April.

• The Environmentalists do not charge that the Forest Service is polluting Rock Creek or destroying its fish. We have no proof that they are doing this, and the USFS has no proof that they are not. But the Forest Service has publicly indicated that the water and fish are the most important resource in Rock Creek, one of Montana's blue ribbon trout

streams, yet they have logged the drainage for 5 years and continue to increase logging, in complete ignorance of the effect which this logging has on the stream and fish, and on the wildlife of Rock Creek.

The Environmentalists do appreciate Kaimin coverage of environmental problems brought up

at our meetings, however we wish that they be as accurately covered as possible.

Bengals stop 'Tips 124-100 behind scoring of ISU guards

POCATELLO—Plagued by second-half turnovers and the shooting of Bengal guards Willie Humes and O'Neil Simmons, the Montana Grizzlies suffered a 124-100 conference loss to Idaho State last night.

The Grizzlies gave up 24 turnovers in the last half to aid the Bengals in an 82-point second half. The Grizzlies gave up the ball 33 times during the game. The Grizzlies led by 45-42 at the intermission.

The Bengals began to show dominance just after the half as they jumped to a six-point lead. The Grizzlies pulled within three, 67-64, but Humes and Simmons led an ISU surge.

Humes was the top scorer for the game with 45 points. Simmons was next with 33 points and Grizzly Dave Gustafson had 30 points. Other Grizzlies scoring were John Harrell with 20 points and Don Wetzel, Ray Howard and Willie Bascus who had ten points each.

Montana shot 51 per cent from the field to the Bengals' 47 per cent. But the Bengals had a big advantage on the boards as they

pulled down 73 rebounds while the Bruins grabbed 43.

Weber State took the Big Sky Conference title last night by defeating the Bobcats of Montana State University 80-55.

Montana is now 5-7 and the Bengals are 10-4.

The Grizzlies were defeated twice this weekend in Ogden, Utah, by the Weber State Wildcats; 104-61 Saturday night and 58-51 Friday night.

Montana hit only 31 per cent of the field goal attempts Saturday night as compared to 46 per cent for the Wildcats. Weber State hit 74 per cent of their freethrows and the Grizzlies hit 48 per cent.

Top scorer was Jon Knoble of Weber with 19 points followed by Gustafson with 18.

The Grizzlies fought a hard defensive battle Friday night and pulled to a 51-50 lead against the Wildcats only to be stopped as Weber State rallied for a 58-51 win.

Gustafson was top scorer with 23 points followed by Ray Howard with 17 and Willie Sojourner of Weber with 16 points.

Cub cagers to play North Idaho after two road losses to Flathead

The Montana Cubs, who suffered defeat twice at the hands of Flathead Community College of Kalispell over the weekend, face North Idaho Junior College Thursday night in Coeur d'Alene, Idaho.

The Cubs faced the North Idaho squad here earlier in the season defeating them 111-78 as the Cubs' leading scorer, Jeff Nord, hit 29 points.

Friday in Kalispell the Mountaineers got a 34-point performance from 6-6 forward Mike Vernon and solid rebounding from Dexter Holloway to dump the Cubs 114-95. The Flathead club was never behind as the closest the Cubs came was 53-49 at half-time after falling behind 41-24.

Nord was the Cubs' leading scorer with 31 points.

Saturday night the action shifted to Columbia Falls where the Flathead Valley Mountaineers overcame a 75-74 deficit to take

the contest by a 90-83 margin.

Vernon again paced the offensive charge for FVCC as he tallied 21 points to lead all scorers. Brad Richey was the offensive leader

for Montana with 16 points.

The Mountaineers boosted their season record to 23-3 while the Cubs fell below the .500 mark with a 7-8 mark on the year.

CONCERNING U

• Applications for resident assistant positions for the 1970-71 academic year may be picked up in any of the men's residence hall offices.

Applicants must have a 2.25 grade point average and an interest in working with people. Interviews will begin in March and all positions will be filled by the end of Spring Quarter. All old applications will be discarded after the positions are filled.

• Because of a state regulation, dogs will no longer be allowed in or around the UC.

• Students interested in a petition to create a Missoula housing authority will meet Thursday at 4:30 p.m. in UC 360 J.

• The University of Montana chapter of Pi Delta Phi, national French honorary, recently initiated

20 new members. Each initiate must be a major or minor in French.

Initiates are: Mary Lou Arness, Carolyn Ronchetto, Deanna Dean, Marsha Spicher, Patrick Dwyer, Sharon Strobel, Jere Gilles, Susie Volkel, Wanda Grande, Sara Wilcox, Jeri Schaeffer, Laura Lee Willing, Barrie Huff, May G. MacDonald, Cathy Dean, Patty Kelly, Gail Potter, Mary Farrington and Helen Stark Carlson.

• Synadelphic House will be accepting applications for Spring Quarter residents. Applications are available at 540 McLeod Ave. and are due Friday.

• R. J. Hanks, Utah State University professor, will speak today at 2 p.m. in F 201 on "Soil-Water-Plant Relations Under Conditions of Limited Water." To-

night he will speak in LA 11 at 7:30 on "Water Pollution, Soil and the Environment."

Mr. Hanks will be available for consultation tomorrow. Contact the forestry office for appointments.

• James L. Talbot, professor at Lakehead University at Port Arthur, Ontario, has accepted the position of professor and chairman of the UM geology department, effective July 15.

He replaces Robert W. Fields, who will resume teaching and research duties as a member of the faculty. Mr. Fields has been head of the department for five years.

• UM's Concert Band will present a free concert tonight at 8 in the University Theater. The concert is being held to express appreciation to those who made it possible for the band to perform at the Camellia Bowl last December.

Lectures, Seminars

TODAY

☆ A fire prevention film, "The Choice Is Yours" will be shown Tuesday at 3 p.m. and again at 4 p.m. in UC 361A. Anyone may attend.

THURSDAY

☆ A panel of four Indians and four non-Indians will discuss the book, "Custer Died for Your Sins," by Vine Deloria Jr., Thursday night at 8:15 in the Music Hall.

H. Duane Hampton, associate professor of history, will be moderator.
